# SANJANA KADAPATTI

9886413418 | kadapattisanjana@gmail.com | LinkedIn | GitHub

## TECHNICAL SKILLS

- **Programming & CS Fundamentals**: Python, Java, Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Problem Solving
- **Backend & Frameworks**: REST APIs, API Integration, GitHub API, Backend Development
- **Databases**: SQL, MySQL, MongoDB (NoSQL), Database Management
- **Development Tools**: Linux, Shell Scripting, Git, GitHub, OpenAI Codex
- **Software Development**: SDLC, Software Development Fundamentals, Analytical Thinking, Debugging, Problem Solving
- **Networking**: Cisco IOS-XR, CCNA-level Networking, OSI/TCP-IP, IPv4/IPv6, Subnetting, Routing, Switching, VLANs, STP, OSPF, NAT, ACLs, DHCP, DNS, Network Security, Troubleshooting
- **Network Automation**: Python Scripting, CLI Automation, YAML/JSON Parsing, CDET, Testbed Integration, Git/GitHub, PR Automation
- **AI Technologies**: Agentic AI Fundamentals, LLMs, RAG, Prompt Engineering
- **Web Technologies**: HTML5, CSS3, JavaScript

## EXPERIENCE

**Cisco Systems** Aug 2025 - Aug 2026

*Software Engineer Trainee* *Bengaluru, Karnataka*

- Architected an AI-assisted documentation workflow for IOS-XR AP Python code using Python, AST/tokenize metadata extraction, LLM-driven comment generation, and Git/GitHub automation to close documentation gaps, improving documentation accuracy by up to 60% while preserving runtime behavior.
- Built deterministic Python pipelines for intent extraction, comment generation, annotated file creation, and PR-ready publishing using YAML config, CLI orchestration, and structured metadata processing.
- Developed a SIM topology automation framework that parses AP/Sub-AP metadata, testcase topology variants, and CAFY POD/topology JSON inputs to generate simulator-ready YAML using Python and PyYAML.
- Automated topology inventory, validation, and HTML/CSV coverage reporting, and streamlined topology onboarding through CAFY topology JSON discovery and normalization.
- Automated end-to-end workflows for AP/Sub-AP detection, generated-file manifests, branch creation, CDET and GitHub PR flows, and review-safe comment-only validation.

## PROJECTS

**AI-Powered ATS Resume Scorer** | *Python, FastAPI, Streamlit, Sentence Transformers, Groq* March 2026 – April 2026

- Built an end-to-end resume analysis platform parsing PDF/DOCX resumes, evaluating ATS compatibility, and generating actionable feedback with Groq API-powered insights.
- Implemented semantic JD matching via Sentence Transformers & spaCy, integrated Supabase auth/history, and PDF/.txt export via WeasyPrint/Report Lab.

**RAG-Based Document Intelligence System** | *n8n, RAG, LLM, Embedding, Vector Database* Feb 2025 – March 2025

- Developed a Retrieval-Augmented Generation (RAG) AI agent that automatically ingests PDFs from Google Drive, generates vector embeddings, and stores them in Pinecone for semantic retrieval.
- Built an intelligent document Q&A system using n8n, enabling users to query uploaded documents through Telegram and receive context-aware, document-grounded responses.

**E-Fy – A Techtainment Book (KSCST Sponsored)** | *HTML5, CSS3, JavaScript, PHP, MySQL* Jan 2024 – May 2024

- Built a web-based event management system to streamline event scheduling, registration, and data management using HTML5, CSS3, JavaScript and MySQL.
- Implemented backend integration, input validation, and basic security practices while following SDLC concepts to develop and test the application efficiently.

## EDUCATION

**KLE Institute of Technology, Hubli, Karnataka** Hubli, Karnataka

*Bachelor of Engineering in Computer Science (8.6)* *2020–2024*

## ACHIEVEMENTS AND CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- Cisco Certified AI Technical Practitioner
- Cisco Certified Network Associate Automation
- Java Basics certification - Coding Ninjas (Code 360)
- Received Cisco "**Play to Win**" Award for the project "**AI-Assisted Code Documentation Generator**"
- Published a research paper on "**AI-driven intent-aware code documentation**" in Cisco's proprietary "**Qubit**" platform
- Received KSCST sponsorship for E-Fy – A Techtainment Book
